

Cell Phone: 1-507-838-5418

I've decided to start using my cell phone as a main contact number for all Electrical Inspection related calls. I will be keeping my office phone number so if you forget and call it, o' well. Eventually you will get a recording to call my cell phone. Feel free to give out my contact information to people who need to reach me.

A few requests,

- 1) Call between 7:00-8:30 AM with inspection requests. Rude awaiting may put you into voice mail so leave a message. I'll return call as soon as I can.
- 2) Try to use e-mail for inspection requests as much as possible. E-mail request the day prior to needed inspection. I will respond that I received it one of first things the following morning. If you do not get a response please call me.
- 3) If a question pops up during the day feel free to call. If you get my voice mail, leave me a message. I probably will not return missed calls without a message.
- 4) Texting is fine with me.
- 5) Try to start entering REI's on line so you can reference a request number when you call, e-mail or text me. (Contractors only at this time)
- 6) Arrange final inspections just like rough-in inspections, especially inspections other than one time ready now inspections.
- 7) Always include a contacts phone number of someone to gain entrance to jobs on the request.

Contact Info: Michael Anthony
MN Contract Electrical Inspector
507-838-5418 m-f 7:00-8:30 AM
inspect.anthony@gmail.com

Thanks for all your help,
Mike
